NOTIFICATION OF RATE INCREASE FROM NTGCD

Dear Members & Customers

Collin County was recently included into the newly formed North Texas Groundwater Conservation District (NTGCD). The object of the District is to monitor existing wells and their production with regard to usage and conservation and control the installation of new wells. On October 11th, 2011 their Board of Directors established a budget and water production rate fee; this will be 10c per 1,000 gallons produced.

The increase will take effect January 1st, 2012 and will be seen in the bills sent out for January usage. For most of our customers this will be in the region of a 40c increase (your first 1,000 gallons is included with your base rate of \$18.00), for our higher users this will mean \$1 per 10,000 gallons used.

If you have any questions regarding the increase please do not hesitate to contact the office or visit their website at www.northtexasgcd.org.

Tony Del Plato
President WWSC
